Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Billups (EP 1180615).

Billups discloses a belt comprising an elastomeric body (22), a tensile member (32) extending along the belt in a longitudinal direction, the body having a rib (29) extending in an endless direction, and a thermoplastic layer (27) attached to the rib (see Fig).

Re claims 2 and 8, the thermoplastic layer is selected from polyethylene, etc (col. 3 lines 1-13).

Re claims 3 and 9, the elastomeric body is selected from HNBR, EPDM, etc (col. 2 lines 30-41).

Re claim 4, the thermoplastic layer is applied to the rib edge (see Fig).

Re claims 5 and 10, further comprising a plurality of ribs (col. 2 lines 22-30).

Re claim 6, the thermoplastic layer is attached to a rib tip (see Fig).

Re claim 11, further comprising fiber (col. 2 lines 6-12).

Response to Arguments

Some further comments regarding the applicant's remarks are deemed appropriate.

The applicant argues that the Billups reference fails to meet the limitations of the claims because the belt described is used for synchronous drive applications. Paragraph 11 of the Billups reference discloses that the belt may also be a single V-grooved belt or a multi-grooved belt, which would require that the teeth run in the longitudinal direction of the belt, and therefore the reference meets the limitations of the claims.

The applicant's remarks have been accorded due consideration, however they are not deemed fully persuasive.

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
